

The ProjectFlow®

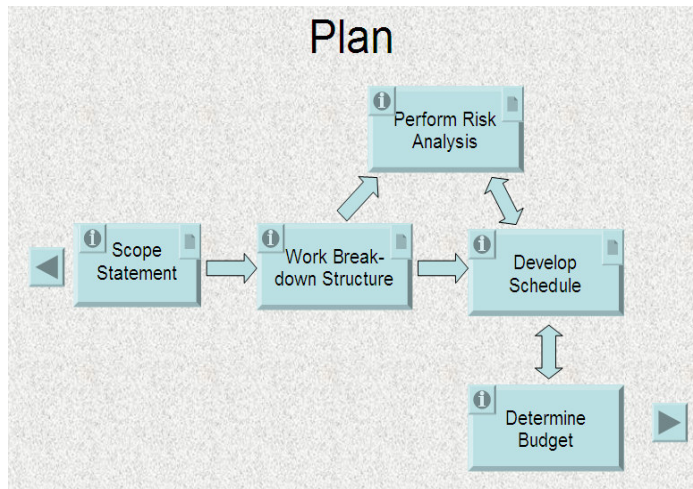

Blended E-learning and Experiential Programme (BEEP)

ProjectPro now offers the popular *ProjectFlow*® course as a **B**lended **E**-learning and **E**xperiential Programme (BEEP).

Module 1: eLearning. On registering for the *ProjectFlow*® course learners access the online e-learning course. They also receive a printed copy of the Project Management Institute's (PMI)® latest Project Management Body of Knowledge (PMBOK® Guide) 4th Edition to study during the e-learning course.

Module 2: Methodology. This 2-day module of classroom training revises the theory taught in module 1. Each learner receives a CD containing the *ProjectFlow*® methodology, which is based on the latest PMBOK 4th edition as well as the soon to be published ISO 21500 Guidance on Project Management. The methodology guides the learners through the sequential flow of processes and documentation from Project Charter through all the project phases to Project Close-out. Templates and sample documents are provided on the CD.

Module 3: Experiential. On day 3 the teams develop a major deliverable, namely a Project Management Plan using real-world tools such as laptop computers loaded with the *ProjectFlow*[®] methodology, Microsoft Project, PowerPoint, Excel, Access and Word. The teams produce a scope statement, work breakdown structure, project organisational structure, risk analysis, responsibility assignment matrix, activity networks, critical path analysis, budget, earned value management, etc. At the end of

day three each team member has an opportunity to present a portion of their Project Management Plan.

On the morning of day 4 the teams execute the project that they have planned. The projects vary depending on the location and client requirements. ProjectPro supplies the building materials. Examples are:

- building rafts to execute a search and recovery exercise for a submerged treasure chest
- build a bridge to carry the team across a barrier.

On the afternoon of day 4 the last deliverable for the *ProjectFlow*[®] learners is to produce a close-out report on the achievement of project objectives and to document the lessons learned.

Module 4: Webinars.

Each learner receives on-going support after the course via regular project management Webinars facilitated by Terry Deacon a certified Project Management Professional with over 35 years of experience.

The ProjectFlow course serves as excellent preparation for those wishing to obtain:

- Certification with the Project Management Institute (PMI)[®] as a Project Management Professional (PMP)[®]
- Registration with the South African Council of Project and Construction Management Professions (SACPCMP) as a Professional Construction Project Manager (Pr CPM)
